Susan Reinhard, Senior Vice President and Director, AARP Public Policy Institute & Chief Strategist, Center to Champion Nursing in America
- 2:30 p.m. **Charge to the Committee**
Paul Kuehnert, Associate Vice-President-

Statement of Task

The Future of Nursing 2020-2030

An ad hoc committee under the auspices of the National Academies of Sciences, Engineering, and Medicine will produce a consensus report that will chart a path for the nursing profession to help our nation create a culture of health, reduce health disparities, and improve the health and well-being of the U.S. population in the 21st century. The committee will examine the lessons learned from the Future of Nursing Campaign for Action as well as the current state of science and technology to inform their assessment of the capacity of the profession to meet the anticipated health and social care demands from 2020 to 2030, with emphasis on multi-sector teams and partnerships.

In examining current and future challenges, the committee will consider:

- the role of nurses in improving the health of individuals, families, and communities by addressing social determinants of health and providing effective, efficient, equitable, and accessible care for all across the care continuum, as well as identifying the system facilitators and barriers to achieving this goal.
- the current and future deployment of all levels of nurses across the care continuum, including in collaborative practice models, to address the challenges of building a culture of health.
- system facilitators and barriers to achieving a workforce that is diverse, including gender, race, and ethnicity, across all levels of nursing education.
- the role of the nursing profession in assuring that the voice of individuals, families and communities are incorporated into design and operations of clinical and community health systems.
- the training and competency-development needed to prepare nurses, including advance practice nurses, to work outside of acute care settings and to lead efforts to build a culture of health and health equity, and the extent to which current curriculum meets these needs.
- the ability of nurses to serve as change agents in creating systems that bridge the delivery of health care and social needs care in the community.
- the research needed to identify or develop effective nursing practices for eliminating gaps and disparities in health care.
- the importance of nurse well-being and resilience in ensuring the delivery of high quality care and improving community health.

In developing its recommendations for the future decade of nursing in the United States, the committee will draw from domestic and global examples of evidence-based models of care that address social determinants of health and help build and sustain a culture of health.

A NOTE TO ATTENDEES

The purpose of this open session is for the committee to interact with the sponsor to fully understand the statement of task. Please note that the committee is in the process of assembling materials that it will examine and discuss in the course of making its findings, conclusions, and recommendations. Comments made by individuals, including members of the committee, should not be interpreted as positions of the committee or of the National Academies. Questions posed by committee members in these information gathering sessions may not be indicative of their personal views, to say nothing of that person's future position as it may evolve in the course of the project. The committee will consider many sources of evidence and deliberate thoroughly before writing its draft report and, once the draft report is written, it must go through a rigorous review by experts who are anonymous to the committee. Therefore, observers who draw conclusions about the committee's work based on today's discussions will be doing so prematurely.

The committee will hold three town hall meetings at locations across the country to gather information and hear from the public. Please be sure to sign up for the study listserv to receive notices invitations for those town hall meetings here:

<https://nam.edu/the-future-of-nursing-2020-2030/>

Additionally, anyone is welcome to submit written comments and evidence to the committee (futureofnursing2030@nas.edu). Materials submitted to the committee will be made publicly available through the study's Public Access File.

We thank you for your time to attend today's open session!

Please join and follow the conversation at #FutureofNursing2030.
